Dr. Joseph P. Ferrell is a physicist and author of the highly acclaimed *Giza Death Star* trilogy and the just released *The Cosmic War*. One of the best books I've ever read is *The SS Brotherhood of the Bell The Nazis' Incredible Secret Technology*. Dr. Ferrell takes us on a journey beginning with the super high-tech Nazi secret weapons project code-named "The Bell". This project was given a classification "decisive for the war" which was higher than any other secret weapons project including its atomic bomb. This was new physics that left a trail of murdered eyewitness scientists and attempts to destroy all records of the development of "the Bell". The Bell technology could be the secret behind Roswell, MAJIC-12, the Kennedy assassination, and the terrorism we're experiencing today. It is conceivable that "the Bell's" development will have an impact on the future of the world, as we know it. This is of such importance and significance that we're devoting a 2-hour special for only the second time on *Erskine Overnight*. www.adventuresunlimitedpress.com 815) 253-6300 11/03/07

Barrie Zwicker was the first journalist in the world to deeply question, on national TV, the official 911 story. *Towers of Deception* is the only book that details the mainstream cover-up of 9-11. There existed a crime scene that has never been investigated and the media has remained silent. The residual fall-out of this deafening silence has been failed wars without justification in Iraq and Afghanistan, suppression of our civil liberties, and an economy teetering on the brink of bankruptcy. All of these events were made possible by the events of 9-11 and the media failing to ask the simplest of questions. The media has become imbedded against any search for truth. Tonight we offer a worldview from this courageous Canadian journalist.
